Address
Jaipur,Rajasthan ,India - 302020

Education

2021
MBA (Finance)
Jaipur National University (JNU)

2016
B-Tech (ECE)
B.K. Birla Institute of Engineering and Technology, Pilani

Technical Skills

- Programming Languages:** Java, J2EE, PL/SQL, JavaScript, TypeScript
- Frameworks:** Spring (Spring Boot, Spring MVC, Spring Cloud), Hibernate, Angular, React
- Microservices:** Design and development of scalable microservices architecture
- Databases:** MySQL, Redis, Oracle
- Cloud & DevOps:** AWS, Azure, Docker, CI/CD pipelines, Git
- Messaging Systems:** JMS, MQ, Kafka
- Monitoring Tools:** DataDog, Splunk, Graphana

Certificates

- Software AG Certified API Management Associate:** Software AG
- Software AG Certified webMethods.io Integration Associate:** Software AG Certified webMethods

Language

English

Rishi Sharma

Engineer - III

Certified Fullstack Software Engineer with over 6+ years of experience specializing in backend development, particularly in architecting, designing, and implementing highly scalable microservices using Java and Spring Boot. Strong advocate of Clean Code principles and Test-Driven Development (TDD), ensuring high-quality code and efficient development processes. Proficient in a variety of technologies including Java/J2EE, Spring MVC, Microservices, MySQL, Redis, Elasticsearch, and RESTful APIs, with additional skills in React for frontend development.

Experience

Sept' 2024 - Present
S&P Global | Market Intelligence
Senior Software Engineer - III (FullStack)

- Working on complex business DataExtraction product utilizing Java, Spring Boot, and microservices. Managing the complete software development lifecycle (SDLC)
- Enhanced the predictive analytical language processing model using (NLP) techniques to extract accurate data, significantly improving efficiency metrics. Implemented ETL (Extract, Transform, Load) processes for data pre-processing, transforming documents into XML format for seamless integration with real-time data consumption systems.
- Optimized server-side processing of documents using Java, establishing seamless interactions with various microservices. Integrated ActiveMQ for message brokering, enabling asynchronous communication between microservices and enhancing system decoupling and throughput.
- Performance Monitoring and Optimization: Integrated application performance monitoring (APM) tools like DataDog and Grafana for in-depth performance diagnostics. Leveraged SQL optimization techniques, including indexing and query refactoring, to enhance database responsiveness.
- Implemented AWS Secrets Manager for secure management of credentials and tokens, ensuring compliance with industry security standards and best practices for sensitive data handling.
- Designed and integrated Azure DevOps pipelines for microservices deployment, automating build, test, and release processes using Docker and Kubernetes, which reduced deployment time and minimized errors through robust CI/CD practices.

Jan' 2023 - Aug' 2024
Covalience | Chandigarh, India
Sr. Application Engineer II (FullStack)

Experienced in design, development, and implementation expertise in server-side Java and J2EE development using Spring RESTful APIs. Contributed to the architecture and implementation of critical features, optimizing SQL queries and procedures. Proficient in both front-end and back-end development, with significant experience in building scalable and resilient microservices, CI/CD pipeline creation, and Dockerization.

- Core Competencies:**
- Java & J2EE Development: Proficient in Java, JDBC, SQL, Servlets, JSP, RESTful APIs, and Spring (Spring Boot, Spring MVC).
 - Front-End Development: Strong skills in Angular framework, JavaScript, and JQuery.
 - Microservices Architecture: Experience in designing and developing scalable microservices.
 - Database Optimization: Expertise in optimizing SQL queries and procedures to improve website responsiveness, using complex flow services and various SQL triggers.
 - CI/CD & Dockerization: Experienced in creating and configuring CI/CD pipelines and Docker containers.

Jan' 2020 - Jan' 2023
Innovatechs Technology Solutions | Hyderabad, India
Software Engineer- (Java)

Engineered WebMethods using java and J2EE technologies, specializing in optimizing system performance. Skilled in Web Development and Proficiency in Java, JDBC, SQL, Servlets, JSP, RESTful APIs, and Spring Boot. Adeptive at administrative tasks and collaborating within an Agile environment. Here We established B2B network for Licencing of Energy Plants.

- Key Achievements:**
- Development:** Worked on RESTful APIs, using Java and J2EE and Hibernate, used Spring Boot framework, Spring Security and Amazon S3 client
 - Data Transformation:** Developed, mapped, and transformed XML to EDI documents for seamless data exchange using FTP and reverse invocation servers.
 - Administrative Proficiency:** Configured JDBC Adapter for databases and migrating patches between development environments through the Pub-Sub model.

Projects

Foreseer - AI
Analytical tool to extract information from unstructured financial Documents
Enterprise platform leveraging AI and NLP to extract information from unstructured data at mass Level.

Plan4HealthCare
Govt. health care financial and Budgeting platform
Budgeting software for Govt. medical Hospitals to estimate and maintain budget in real time.

DOE - Abu Dhabi
Department of Energy Govt. Licencing Platform
Deperatment of Energy Licencing platform with securities and authentications.
